

A cross-sectional view of a circular device. The outermost layer is labeled 301. Inside this is a layer with a dotted pattern, labeled 302. A central vertical structure is labeled 303. A horizontal structure, possibly a valve or actuator, is labeled 304. A curved line or boundary is labeled 305. A small cluster of circular elements is labeled 306. Arrows indicate flow or movement: one arrow points left from the cluster 306, another points right towards the horizontal structure 304, and a third points up along the left side of the vertical structure 303.
